WHO WE ARE

About Us

TAAI Construction and Machinery Services Ltd is a well-established Malawian civil engineering and road construction contractor with over 20 years of experience. We deliver quality infrastructure including roads, asphalt surfacing, earthworks, structures, drainage, bridges and water infrastructure. We combine an owned plant fleet, an in-house asphalt plant and an experienced site management team to deliver projects that are safe, on programme and built to specification.

Our business is built on self-delivery. Because we own and maintain our excavators, dozers, graders, rollers, pavers, tippers and support equipment, we control our own programme rather than depending on hired plant. The same fleet is offered to the market on a dry- or wet-hire basis through our machinery services division.

100% Self-delivered plant capability

24/7 Plant maintenance and support

ISO Aligned quality & safety systems

1 In-house asphalt plant & laboratory

WHAT DEFINES US

- Owner-managed, hands-on leadership that stays close to every site.
- A modern, well-maintained plant fleet backed by our own workshop and spares holding.
- Quality proven by testing, not by assumption — every layer is checked before it is covered.
- A safety culture where no programme pressure justifies an unsafe act.

OUR DIRECTION

Vision & Mission

VISION

To be the contractor of choice for road and civil infrastructure in the region — recognised for engineering discipline, reliable plant and work that still performs decades after handover.

MISSION

To deliver road, asphalt, earthworks and water infrastructure that meets specification first time; to invest continuously in plant, people and testing capability; to protect the health and safety of everyone on our sites; and to create lasting value for our clients, our employees and the communities in which we build.

OUR VALUES

Safety First

Everyone goes home.

Integrity

We price and report honestly.

Quality

Tested, not assumed.

Ownership

We fix what is ours to fix.

Respect

For people, land and community.

Reliability

The programme is a promise.

THE DIFFERENCE

Why Choose Us

Clients appoint us for capability they can verify — owned plant, in-house materials production, tested quality and a management team that is present on site.

01 Owned plant, controlled programme

Excavators, dozers, graders, loaders, rollers, pavers and tippers are ours. No waiting on third-party hire when the weather window opens.

02 Our own asphalt plant

Hot mix is produced to our own job mix formula and delivered to site at temperature — consistent quality, no supply queue.

03 In-house laboratory

Compaction, gradation, CBR, bitumen content and Marshall testing carried out as the work proceeds, not after the fact.

04 One contractor, full scope

Clearing, earthworks, layer works, structures, drainage, kerbing, surfacing and line marking under a single contract.

05 Safety that is managed, not posted

Documented risk assessment, daily toolbox talks, traffic management and incident reporting on every site.

06 Workshop and spares support

Preventive maintenance schedules and a critical spares holding keep fleet availability high in remote locations.

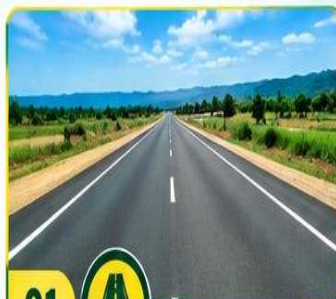

OWNED PLANT. OWN ASPHALT. TESTED QUALITY.

One contractor accountable for the whole road — from first cut to final line marking.

WHAT WE DO

Core Services

A single contractor across the full road and civil infrastructure cycle — from first cut to final line marking, supported by our own plant and materials production.

01

Road Construction

New carriageways, rehabilitation and upgrading from formation to final surfacing.

02

Asphalt Surfacing

Hot mix asphalt production, paving, overlays, patching and surface dressing.

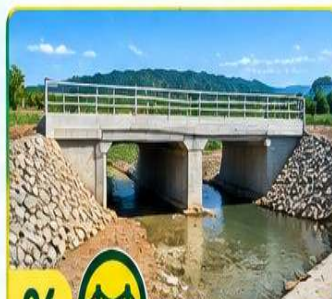

03

Earthworks

Bulk excavation, cut and fill, subgrade preparation and layer works to specification.

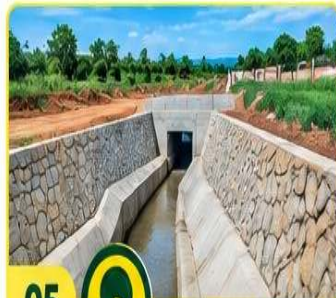

04

Bridges & Culverts

Reinforced concrete structures, box culverts, abutments, decks and river crossings.

05

Drainage Works

Storm water systems, lined and unlined drains, catch pits, headwalls and outfalls.

06

Canal Construction

Irrigation and water conveyance canals, lining, embankments and control structures.

07

Car Parks & Hardstands

Commercial and industrial paving, kerbing, line marking and access roads.

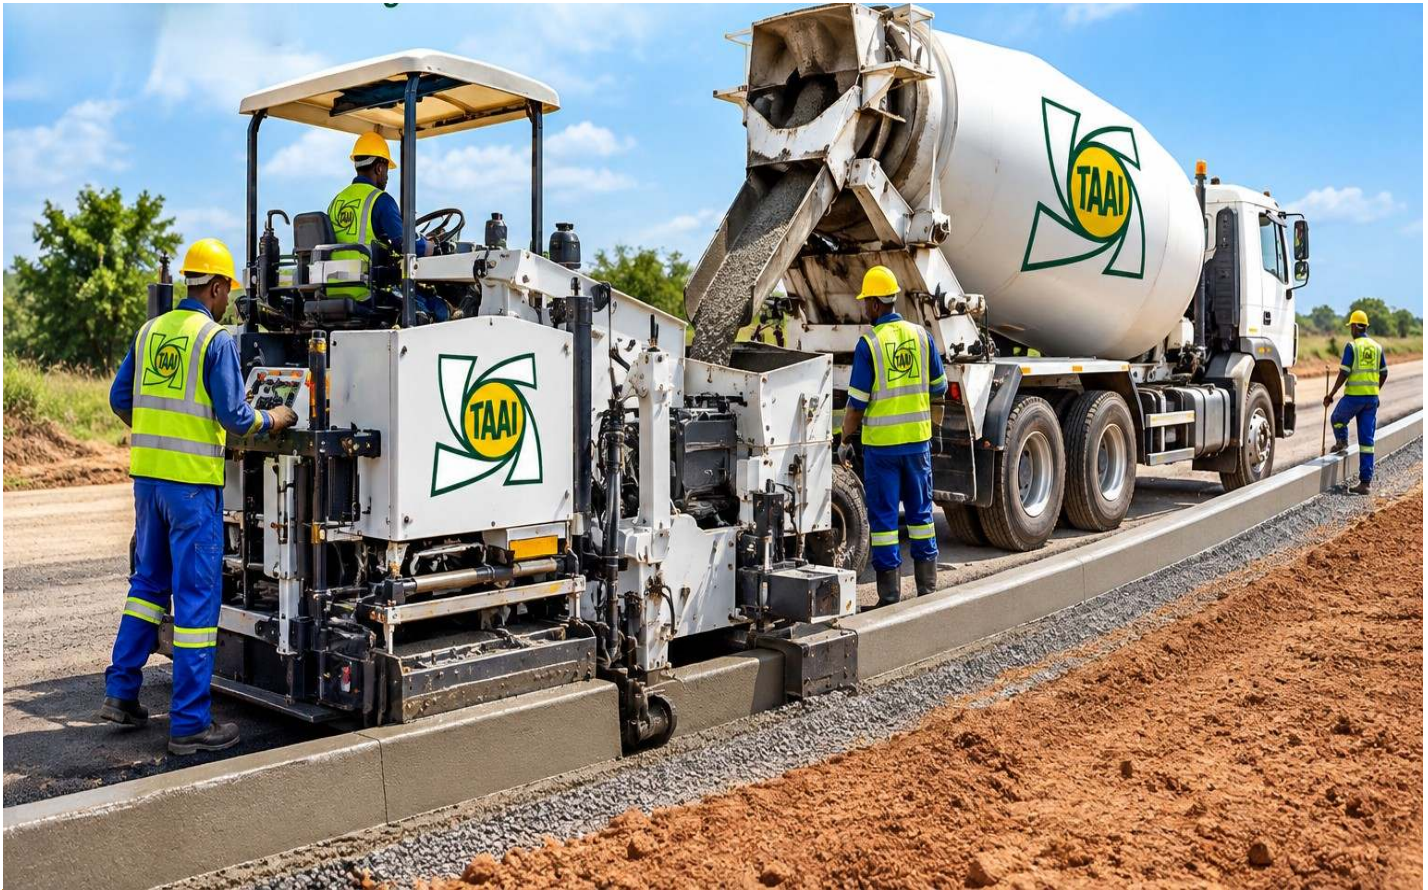

08

Plant Hire & Machinery Services

Dry and wet hire of earthmoving, paving, compaction and transport equipment.

CORE SERVICE 01

Road Construction

We build and rehabilitate roads from formation level to final surfacing. Our teams handle clearing, earthworks, layer works, structures, drainage, kerbing and surfacing under one contract, using our own plant and materials production.

SCOPE OF WORKS

- Site clearing, grubbing and topsoil stripping
- Bulk earthworks, cut to fill and embankment forming
- Subgrade preparation and improvement
- Sub-base and crushed stone base course to specification
- Prime coat, tack coat and asphalt or surface dressing
- Kerbing, shoulders, walkways and road furniture
- Line marking, signage and guardrail installation

ROAD TYPES WE DELIVER

- Trunk and primary highways
- Township and urban carriageways
- Rural gravel access roads
- Industrial and mine haul roads
- Airport and depot pavements
- Rehabilitation and overlay contracts

CORE SERVICE 02

Asphalt Surfacing

Backed by our own asphalt plant, we produce, haul, lay and compact hot mix asphalt to the approved job mix formula. Temperature and compaction are controlled from the plant to the final roller pass, and every lot is tested before acceptance.

SCOPE OF WORKS

- Hot mix asphalt wearing, binder and base courses
- Structural overlays and inlays on existing pavements
- Milling, patching and pothole repair
- Surface dressing and chip sealing
- Prime and tack coat application by bitumen distributor
- Joint construction, edge sealing and level correction
- Thermoplastic and cold-paint line marking

CONTROL POINTS

- Mix temperature at discharge and laydown
- Paver speed and screed setting
- Rolling pattern and compaction density
- Core thickness and air voids
- Bitumen content and gradation checks
- Surface regularity and ride quality

CORE SERVICE 03

Earthworks

Earthworks set the shape and strength of everything built on top. Our excavator, dozer, grader, loader and tipper fleet moves and places material efficiently, while survey control and density testing keep every layer inside tolerance.

SCOPE OF WORKS

- Bulk excavation and mass haul
- Cut to fill balancing and spoil management
- Embankment construction in controlled layers
- Subgrade improvement and soft spot removal
- Trenching, backfilling and reinstatement
- Borrow pit development and rehabilitation
- Site levelling, platforms and terracing

DELIVERED WITH

- Short and long reach excavators
- Track dozers for spreading and pushing
- Motor graders for trimming to level
- Wheel loaders and tipper fleet
- Vibratory rollers for layer compaction
- Water bowsers for moisture control

CORE SERVICE 04

Bridges & Culverts

We construct the reinforced concrete structures that carry roads over water and terrain — from single-cell culverts to multi-span river crossings — including all temporary works, formwork and river management required to build them safely.

SCOPE OF WORKS

- Reinforced concrete box and pipe culverts
- Bridge foundations, piling and abutments
- Piers, headstocks and bearing installation
- Precast beam handling, placing and deck construction
- Parapets, expansion joints and approach slabs
- River training, scour protection and gabion works
- Rehabilitation and widening of existing structures

STRUCTURAL CAPABILITY

- Formwork design and temporary works
- Steel fixing and concrete placement
- Crane lifting and beam erection
- Cube testing and curing control
- Waterproofing and drainage detailing
- Survey control and setting out

CORE SERVICE 05

Drainage Works

Water is the main enemy of any pavement. We design-build and construct drainage systems that get water off and away from the road quickly — protecting the investment for its full design life.

SCOPE OF WORKS

- Storm water pipe and box culvert systems
- Lined and unlined side drains and mitre drains
- Catch pits, manholes, gullies and headwalls
- Sub-soil and French drains
- Outfalls, energy dissipators and scour protection
- Erosion control, gabions and stone pitching
- Cleaning and rehabilitation of existing drainage

WHY IT MATTERS

- Prevents saturation of subgrade layers
- Extends pavement service life
- Reduces flooding of adjacent property
- Protects embankments from erosion
- Keeps roads open in the rainy season
- Lowers long-term maintenance cost

CORE SERVICE 06

Canal Construction

We construct irrigation and water conveyance canals to fine tolerance, from bulk excavation and embankment forming through to concrete lining and control structures — work where levels and gradients must be exact for the scheme to function.

SCOPE OF WORKS

- Canal excavation to designed profile and gradient
- Embankment forming and compaction
- In-situ and precast concrete lining
- Head regulators, offtakes and check structures
- Drop structures, siphons and aqueducts
- Desilting and rehabilitation of existing canals
- Access and inspection roads along canal banks

SPECIALIST PLANT

- Long reach excavators for canal profiles
- Laser and GPS level control
- Concrete mixers and pumps
- Compaction equipment for embankments
- Dewatering pumps and coffer dams
- Survey teams for gradient verification

CORE SERVICE 07

Car Parks & Hardstands

Commercial and industrial paving delivered as a complete package: sub-base, base, surfacing, kerbing, drainage and line marking — designed for the loads the surface will actually carry and finished to a standard the client is proud to open.

SCOPE OF WORKS

- Full-depth asphalt and concrete paving
- Heavy-duty hardstands for laden vehicles
- Kerbing, channels and edge restraints
- Storm water collection and attenuation
- Walkways, ramps and accessible bays
- Line marking, bay numbering and signage
- Lighting bases, ducting and service trenches

TYPICAL APPLICATIONS

- Retail and shopping centre car parks
- Office and hospital parking
- Logistics yards and truck hardstands
- Fuel station forecourts
- Plant and equipment storage yards
- Estate and internal access roads

HITACHI SUB-DEALERSHIP APPOINTMENT LETTER

HITACHI

Reliable Solutions

Date: 12 August 2026

The Managing Director
Taai Construction and Machinery Services Limited
P.O. Box 2435
Lilongwe, Malawi

Dear Sir,

SUBJECT: APPOINTMENT AS SUB-DEALER FOR HITACHI CONSTRUCTION MACHINERY PRODUCTS IN MALAWI

We are pleased to confirm that **Hitachi Construction Machinery Zambia Co., Limited (HCMZ)** has appointed **Taai Construction and Machinery Services Limited** as an authorised Sub-Dealer for Hitachi Construction Machinery products in the **Republic of Malawi**, effective **4 August 2026**.

This appointment follows the signing of the Sub-Dealer Agreement between Hitachi Construction Machinery Zambia Co., Limited and Taai Construction and Machinery Services Limited on 4 August 2026.

Under this appointment, Taai Construction and Machinery Services Limited is authorised to promote, market, supply and support Hitachi Construction Machinery products and related solutions in Malawi, including:

1. **New Hitachi Construction Machinery equipment;**
2. **Premium Rental Hitachi Construction Machinery equipment;**
3. **Premium Used Hitachi Construction Machinery equipment;**
4. **Genuine Hitachi Construction Machinery spare parts;**
5. **Other ancillary products** as detailed in the Sub-Dealer Agreement;
6. **Technology and digital solutions** associated with Hitachi Construction Machinery products;
and
7. **Product support and related after-sales services**, including technical and service support.

Taai Construction and Machinery Services Limited may use this appointment as evidence of its authorised relationship with Hitachi Construction Machinery Zambia Co., Limited for customer engagements, tender and bid submissions, business development activities, marketing and promotional purposes, subject to the terms and conditions of the Sub-Dealer Agreement.

HITACHI

Reliable Solutions

This appointment is effective from **4 August 2026** and shall remain in effect in accordance with the terms and conditions of the Sub-Dealer Agreement between the parties.

We are confident that this partnership will strengthen the availability of Hitachi Construction Machinery products, technology and customer support in Malawi and contribute to the continued growth of the construction, mining, infrastructure, agriculture and related sectors in the country.

Should you require any confirmation regarding the appointment of Taa Construction and Machinery Services Limited, please contact the undersigned.

Yours faithfully,

For and on behalf of

RE: Introduction of Taai Construction & Machinery Services Ltd. – Official Hitachi Sub-Dealer in Malawi

Dear Sir/Madam,

We are pleased to introduce **Taai Construction & Machinery Services Ltd.** as the **official sub-dealer for Hitachi Construction Machinery and related products in Malawi.**

As part of our commitment to providing reliable and comprehensive solutions to the construction, mining, quarrying, agriculture, infrastructure and general earthmoving sectors, Taai Construction is able to supply a wide range of **Hitachi machinery, attachments, accessories, components and genuine spare parts.**

Our product range includes:

1. Hitachi Excavators

We are able to supply Hitachi excavators ranging from **mini excavators through to large-scale excavators**, covering operating classes from approximately **6 tonnes up to 120 tonnes**. This range allows us to cater for applications ranging from general construction and landscaping to major infrastructure, quarrying and mining operations.

2. Hitachi Wheel Loaders

Our range of Hitachi wheel loaders extends from approximately **4 tonnes up to 37 tonnes**, providing suitable solutions for material handling, construction, quarrying, mining, roadworks and other heavy-duty applications.

3. Hitachi Mining Dumpers

Within our range of equipment, we are able to supply mining dumpers to the tailored specification and requirements of the client.

4. Hitachi Backhoe Loaders

We are also able to supply **Hitachi backhoe loaders up to 9 tonnes**, offering versatile and efficient solutions for construction, road maintenance, utility works and general earthmoving applications.

5. Sullair Air Compressors

In addition to Hitachi machinery, Taai Construction can supply **Sullair stationary and mobile air compressors**, providing dependable compressed-air solutions for construction, mining, industrial and other demanding applications.

6. Denyo Power Generators

We also offer **Denyo power generators ranging from 9 kVA up to 2,000 kVA**, providing reliable power-generation solutions for construction sites, mines, commercial operations, industrial facilities and standby power requirements.

✉: taai.civilworks@gmail.com**7. Attachments, Accessories and Genuine Spare Parts**

Taai Construction is able to supply a comprehensive range of **Hitachi-branded and related attachments, accessories, components and spare parts**. These products enable customers to maintain, repair, upgrade and maximise the productivity and service life of their equipment.

Our objective is to provide customers in Malawi with a **complete equipment and after-sales support solution**, from the initial supply of machinery and attachments through to genuine spare parts and component support. We understand the importance of equipment availability and productivity, particularly in demanding construction, mining and infrastructure applications.

Through our relationship with **Hitachi**, together with our technical capabilities and local market presence, Taai Construction is well positioned to support customers with quality machinery, parts and related products backed by professional service.

We would welcome the opportunity to introduce our product range and capabilities to your organisation and to discuss how we can support your current and future equipment requirements.

Should you require any further information, product specifications, quotations or a meeting with our team, we would be pleased to assist you.

We look forward to establishing a mutually beneficial business relationship and to supporting your operations with reliable equipment and quality products.

Yours faithfully,

M.A.K. Ghumra

RE: Introduction of Taai Construction & Machinery Services Ltd. – Earthmoving Machinery Parts and Remanufacturing Services

Dear Sir/Madam,

We are pleased to introduce **Taai Construction & Machinery Services Ltd.**, a specialist provider of parts, component rebuilding, and remanufacturing services for earthmoving machinery and equipment. We operate under the **Hitachi sub-dealership**, enabling us to support customers with quality parts, technical expertise, and comprehensive component solutions for their heavy equipment.

Our objective is to provide reliable and cost-effective solutions that extend the service life of earthmoving machinery, reduce equipment downtime, and offer customers an economical alternative to purchasing new components.

Our key remanufacturing and rebuilding capabilities include:

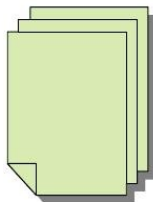

- **Buckets:** Complete manufacturing, rebuilding and remanufacturing of buckets for various earthmoving applications.
- **Hydraulic Cylinders:** Complete rebuilding and remanufacturing of hydraulic cylinders, including inspection, repair and replacement of worn components.
- **Transmissions:** Complete transmission rebuilding and overhaul to restore performance and reliability.
- **Engines:** Comprehensive engine rebuilding and remanufacturing services, including inspection, machining and replacement of worn components.
- **Tandems:** Rebuilding and re-bushing of tandem assemblies to restore operational performance and extend service life.
- **Excavator Arms:** Complete rebuilding and re-bushing of excavator arms, including restoration of worn pivot and mounting points.
- **Earthmoving Machinery Parts:** Supply of parts and components for earthmoving machinery, supported by our technical knowledge and experience in the industry.

At Taai Construction & Machinery Services Ltd., we place strong emphasis on **quality workmanship, durability, reliability and customer satisfaction**. Our remanufacturing services are carried out in Zambia in collaboration with **Hitachi Construction Machinery Zambia**, who are continentally well known. The aim of remanufacturing is to ensure components return to dependable working condition while providing our customers with a practical and cost-effective solution.

We would welcome the opportunity to establish a business relationship with your organisation and to support your earthmoving machinery requirements, whether through the supply of parts, component rebuilding, remanufacturing, or technical support.

We would be thankful to arrange a meeting with you company for further discussions and possible business.

Yours faithfully,
M.A.K. Ghumra

SINOTRUCK APPOINTMENT LETTER

China Sinotruk International Co., Limited.

Official Letter: Statement of Business Cooperation Between SINOTRUK and TAAI
CONSTRUCTION AND MACHINERY SERVICES LTD

To: Valued Customers & Business Partners

Dear Sir/Madam,

This letter is to formally clarify and confirm the relevant business entity and cooperative relationship to your esteemed company.

We are China Sinotruk International Co., Limited. An authorized distributor of Sinotruk. Sinotruk a world-renowned enterprise specializing in the R&D, manufacturing and sales of heavy-duty trucks and commercial vehicles, with a complete commercial vehicle product system, global supply network, and mature market operation and after-sales service capabilities.

TAAI CONSTRUCTION AND MACHINERY SERVICES LTD is our official and long-term cooperative customer, which has been purchasing various types of heavy-duty trucks and related supporting products from us for a long time. A stable, compliant and long-term business procurement partnership has been established between both parties, and all business transactions are in full compliance with the laws and regulations of the respective countries of both parties and international trade rules. And vehicles purchased by Taa Construction are manufactured by Sinotruk and are brand new under Sinotruk guideline.

Thank you for your attention and support. We look forward to establishing friendly and trust-based business cooperation with all partners.

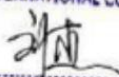

Best regards,

China Sinotruk International Co., Limited

CAPABILITY

Plant & Equipment

Our fleet is the backbone of the business. Every major machine is owned, registered on a preventive maintenance schedule and supported by our own workshop, mobile service units and critical spares holding — so availability stays high even on remote sites.

MATERIALS PRODUCTION

Asphalt Plant

Our asphalt plant gives us direct control of the single most critical input on any surfacing contract. Mixes are produced to an approved job mix formula, temperature-monitored at discharge and hauled in sheeted, insulated tippers so material arrives at the paver within specification.

PLANT CAPABILITY

- Hot mix asphalt to approved job mix formula
- Wearing course, binder course and base mixes
- Cold and hot bitumen storage with controlled heating
- Calibrated aggregate feeders and filler system
- Temperature logging from mixing to laydown
- Dust collection and emissions control

EQUIPMENT RENTAL FLEET 01**Fleet — Earthmoving**

Available for project delivery and for dry or wet hire to third parties, with operators, fuel, servicing and low bed mobilisation arranged on request.

**Excavators (Short Reach)**

20–30 tonne tracked excavators for bulk excavation, trenching, loading and structural excavation.

**Excavators (Long Reach)**

Extended boom machines for canal profiles, river training, drain cleaning and deep batters.

**Track Dozers**

Heavy dozers for pushing, spreading, ripping and forming embankments in controlled layers.

**Motor Graders**

Precision trimming of subgrade, sub-base and gravel wearing course to line and level.

**Wheel Loaders**

Stockpile handling, truck loading and aggregate feeding at plant and quarry.

**Tipper Trucks**

Haulage fleet for aggregates, asphalt and spoil, sheeted and insulated where required.

EQUIPMENT RENTAL FLEET 02**Fleet — Paving & Compaction**

The surfacing train that turns produced material into a finished, compacted and durable pavement — operated by crews who run it every week.

**Asphalt Pavers**

Tracked and wheeled pavers with heated screeds for consistent mat thickness and texture.

**Single & Double Drum Rollers**

Tandem vibratory rollers for breakdown and finish rolling of asphalt layers.

**Pneumatic Tyred Rollers (PTR)**

Multi-wheel rollers for kneading compaction, sealing the surface and chip embedment.

**Chip Spreaders**

Accurate, uniform spreading of stone chippings for surface dressing and seal works.

**Bitumen Distributors (BD)**

Computer-controlled spray bars for prime coat, tack coat and seal applications.

**Kerb Machines**

Slipform extrusion of continuous concrete kerbs, channels and edge restraints.

EQUIPMENT RENTAL FLEET 03

Fleet — Transport & Support

Support equipment keeps the production fleet working: moving machines between sites, supplying water and concrete, and lifting the heavy elements of structural work.

Low Bed Trailers

Heavy haulage of excavators, dozers and graders between sites and depots.

Mobile Cranes

Lifting of precast beams, culvert units, formwork and plant during structural works.

Water Bowsers

Moisture conditioning of layer works and dust suppression on haul roads and access tracks.

Concrete Mixers

Transit mixers supplying structures, kerbing, lining and drainage works.

Workshop & Service Units

Mobile service trucks, fuel bowsers, welding plant and a stocked spares holding.

FORKLIFTS

Material Handling • Loading • Unloading • Site Support.

TRACK RECORD

Major Projects

A representative selection of the work our teams and plant deliver. Detailed project references, client contacts and completion certificates are available on request.

Dedza Loop Road Upgrading **ROADS & ASPHALT**

Rehabilitation and asphalt overlay of a heavily trafficked trunk route including shoulder reconstruction, drainage renewal and line marking.

A-32 Access Roads **EARTHWORKS & ASPHALT**

Construction of gravel access roads with formation, layer works, culverts and mitre drains, opening year-round access to farming communities.

City Centre Area-13, 16 & 19 Township Road Network **URBAN ROADS**

New urban carriageways with kerbing, storm water drainage, walkways and hot mix surfacing across a residential development.

River Crossing & Culverts **STRUCTURES**

Reinforced concrete box culverts and bridge approach works including piling, abutments, deck and river training.

Irrigation Canal Scheme **WATER INFRASTRUCTURE**

Excavation, embankment forming and concrete lining of primary and secondary canals with control structures.

Commercial Car Park **PAVING**

Full-depth asphalt car park with kerbing, storm water attenuation, lighting bases and line marking for a retail development.

Industrial Hardstand **PAVING**

Heavy-duty hardstand and haul road for a plant yard, designed for continuous laden truck movements.

OUR COMMITMENT

Health, Safety & Environment

Nothing we build is worth an injury. Safety is planned into the works from the programme stage and managed daily on site by supervisors who are accountable for it.

HEALTH & SAFETY

- Documented risk assessments and method statements
- Daily toolbox talks and pre-start inspections
- Mandatory PPE and enforced site rules
- Trained first aiders and emergency response plans
- Incident reporting, investigation and close-out

TRAFFIC MANAGEMENT

- Approved traffic management plans on live roads
- Signage, cones, barriers and flagmen
- Speed control through work zones
- Night works lighting and reflective marking
- Public and pedestrian access maintained

ENVIRONMENT

- Dust suppression by water bowser on haul roads
- Controlled fuel and bitumen storage with bunding
- Spill kits and waste segregation on all sites
- Borrow pit rehabilitation and reinstatement
- Protection of watercourses during works

STANDARDS

Quality Assurance

QUALITY ASSURANCE

Quality is designed in, checked as the work proceeds and signed off before the next layer covers it. Every stage has a hold point, an inspection and a record.

01 PLAN

Quality plan, ITP and job mix designs approved before works commence.

02 SET OUT

Survey control, benchmarks and levels verified against design drawings.

03 INSPECT

Hold points inspected and signed by the engineer before covering up.

04 TEST

Field and laboratory testing at specified frequency for every layer.

05 RECORD

Test certificates, as-built survey and photographic records compiled.

06 HAND OVER

Defects list closed out and full quality dossier issued to the client.

TYPICAL CHECKS BEFORE ACCEPTANCE

Layer

Thickness and level tolerance.

Field

Density and degree of compaction.

Asphalt

Temperature at laydown and rolling.

Bitumen

Content and aggregate gradation.

Concrete

Cube strength at 7 and 28 days.

Ride

Quality and surface regularity.

Quality Builds Trust | Safe Roads | Stronger Communities

VERIFICATION

Laboratory & Testing

Our materials laboratory supports both the asphalt plant and the site teams. Testing is carried out to recognised standards, at the frequency set out in the specification, with results issued to the engineer as the work proceeds.

SOILS & AGGREGATES

- Particle size distribution (sieve analysis)
- Atterberg limits and plasticity index
- Proctor compaction (standard & modified)
- California Bearing Ratio (CBR)
- Field density by sand replacement / nuclear gauge
- Aggregate crushing and flakiness

ASPHALT & CONCRETE

- Marshall stability and flow
- Bitumen content and extraction gradation
- Core thickness and density
- Mix temperature verification
- Concrete slump and cube compressive strength
- Trial mixes and job mix formula design

WHO WE WORK FOR

OUR CLIENTS

We work for public authorities, development agencies, contractors and private developers. Client names and references are provided on request in tender submissions.

WHAT OUR CLIENTS GET

A single point of accountability from award to defects liability close-out.

Transparent monthly valuations, progress reports and photographic records.

Plant capacity that can be mobilised quickly and scaled to the programme.

A quality dossier that stands up to audit.

HOW WE ARE ORGANISED

Organisation Structure

A flat structure that keeps decisions close to the site. Each function reports through a single line to the Managing Director.

OUR PEOPLE

Key Personnel

Projects are delivered by people. Our management team combines civil engineering qualification with long site experience, supported by skilled operators, mechanics and technicians. Full CVs are supplied with tender submissions.

Managing Director

Overall accountability for strategy, client relationships and delivery performance.

Contracts Manager

Contract administration, programme, valuations, claims and client reporting.

Project / Site Manager

Day-to-day delivery of the works, resources, subcontractors and site discipline.

Senior Civil Engineer

Technical direction, method statements, temporary works and design interface.

Plant & Workshop Manager

Fleet availability, preventive maintenance, spares and operator allocation.

Quantity Surveyor

Measurement, cost control, procurement and subcontract packages.

HSE Officer

Risk assessment, inductions, inspections, incident investigation and reporting.

Quality / Laboratory Manager

Inspection and test plans, materials testing and quality records.

Land Surveyor

Setting out, level control, as-built survey and volume measurement.

Asphalt Plant Manager

Mix production, calibration, temperature control and haulage coordination.

GIVING BACK

Corporate Social Responsibility

Roads change the communities they pass through. We work to make that change positive — by hiring locally, buying locally, protecting the environment we work in, and leaving something behind that outlasts the contract.

Local Employment

Priority hiring and on-the-job training for people living along our project corridors.

Skills Development

Operator, artisan and technician training that stays with the community after handover.

Community Access

Maintaining diversions, footpaths and access to schools, clinics and markets during works.

Environmental Care

Dust suppression, borrow pit rehabilitation and protection of watercourses.

Local Procurement

Sourcing labour, materials and services from businesses near the works.
